Sheet of 22 November 2026

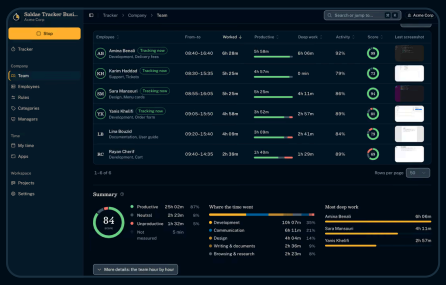

Your whole team's time and productivity, on your own server

Each employee tracks their time with Saldae Tracker. You see the team's day in your own tracker: who is working right now, for how long, what was productive, with the screenshots. Everything stays on a server installed on your side.

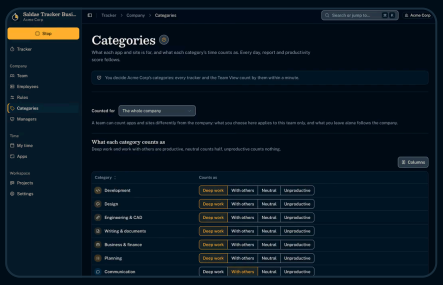

Your whole team's day, in your tracker

What you see

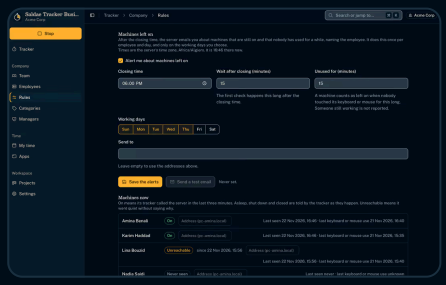

Every employee at a glance

- ✓ Their hours, productive time, deep work, activity, score and last screenshot, sortable by column.
- ✓ Where the team's time went, by category: development, design, messages, meetings, social media.

You decide what is productive, team by team

- ✓ Each team has its own definition of productive work. Facebook can count as work for marketing and as a distraction for accounting.
- ✓ You file each app and each site, then say whether its category counts as deep work, work with others, neutral or unproductive.

Computers left on after closing time

- ✓ You give the closing time and the working days.
- ✓ After that time, an email names the employees whose computer is still on and unused. Someone still working is not reported.

Sheet of 22 November 2026

Every feature

Business edition

- ✓ Each employee's day in your own tracker, with their screenshots
- ✓ The whole team's score, deep work and switches between apps, by day, week or month
- ✓ Teams, and a key per manager with their role
- ✓ Each team has its own definition of productive work, app by app and site by site
- ✓ Your rules for every computer
- ✓ If you decide so, the timer starts by itself and the employee cannot stop it. A closed tracker is reported
- ✓ An email alert when an employee spends too long in an app or a site you watch
- ✓ Each computer on, locked, asleep or shut down, and an email for those left on after closing time
- ✓ Add an employee, give them a new token or revoke them from the app
- ✓ An access log and the server's backups
- ✓ The server installed on your side

Timer

- ✓ Start in one click, no project or setup first
- ✓ A project chosen during the session takes the time already tracked, or starts from now on
- ✓ A memo of what you do, kept with the time
- ✓ S to start or stop, from any screen
- ✓ The timer in the menu bar, with the window closed
- ✓ A weekly limit per project that stops the timer

Work Diary

- ✓ Every 10 minutes with a screenshot taken at random
- ✓ Ten activity bars, one per minute, as tall as its time on keyboard or mouse
- ✓ Never keystrokes, never what is typed
- ✓ Idle time set aside, to keep or discard when you are back
- ✓ Manual time for calls and meetings
- ✓ Assign, describe or delete slots in bulk

Your day

- ✓ Hours, start, end and breaks
- ✓ Your longest focus and most active hour
- ✓ The time on social media and entertainment
- ✓ How the day compares with a typical one
- ✓ A timeline coloured by category, project or app
- ✓ What you did, told by your memos or your windows

Productivity

- ✓ Productive, neutral and unproductive time, by what each app is for
- ✓ Deep work, 30 minutes or more of focus without interruption
- ✓ A productivity score out of 100, with its rule written down
- ✓ Every switch between apps in order, with the bursts and the most frequent pairs
- ✓ Hour by hour, with the activity level beside the score

Apps and sites

- ✓ The app in front and its window title
- ✓ The site of the open tab, on macOS and Windows
- ✓ Instagram, TikTok, Facebook and the rest recognised as social media, as apps or as sites
- ✓ Each app in a category you can correct
- ✓ A day, a week or a month analysed, exported as CSV

Projects and timesheet

- ✓ Optional projects, with client, hourly rate and limit
- ✓ The week or the month by project and day
- ✓ Earnings at each project's rate, per currency
- ✓ Time without a project assigned afterwards
- ✓ CSV export for a client or an accountant

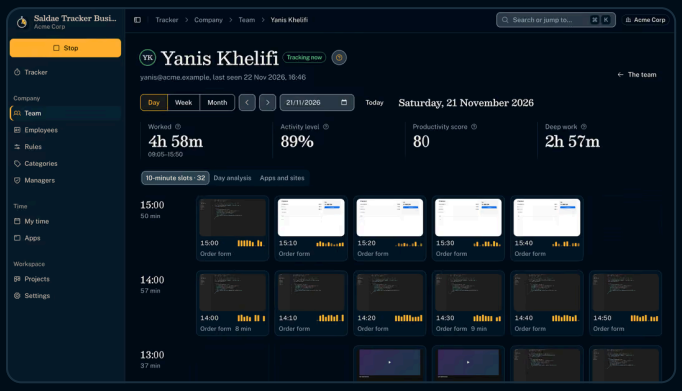

Privacy and data

- ✓ Screenshots on, blurred or off
- ✓ Window titles, app names only, or nothing
- ✓ Everything stays on your computer; nothing goes through us
- ✓ The data folder moved wherever you want
- ✓ macOS permissions asked from Settings only

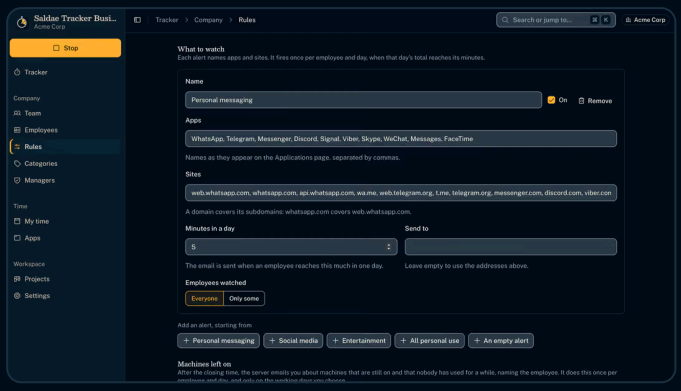

Workspace

- ✓ An illustrated guide on every screen
- ✓ Search or jump anywhere with ⌘K
- ✓ An MCP server, the protocol that lets an AI assistant such as Claude, Cursor, Codex or OpenCode start the timer and read your day
- ✓ macOS and Windows

Indicators and reports

Their Work Diary, with screenshots

Email alerts on the apps and sites you watch

Working time

- ✓ Each employee's tracked hours, by day, week and month
- ✓ The start, the end and the breaks of their day
- ✓ Manual time and idle time, counted apart

Productivity

- ✓ Productive, neutral and unproductive time, by the category of each app and each site
- ✓ The productivity score out of 100, with its rule written down
- ✓ Deep work, 30 minutes or more of focus without interruption
- ✓ Fragmented work and the switches between apps
- ✓ The activity level at the keyboard and mouse, minute by minute

Apps and sites

- ✓ The time spent in each app and on each site
- ✓ The time by category, from work to social media
- ✓ The apps and sites no list knows, to classify

Team

- ✓ Who is working right now
- ✓ The team's figures by day, week or month, compared with the same period before
- ✓ Each team measured with its own definition of productive work
- ✓ Each employee's diary, in 10-minute slots with their screenshots

Computers

- ✓ Each computer on, locked, asleep, shut down or unreachable, with its last use
- ✓ The computers left on after closing time

Alerts and exports

- ✓ An email when an employee passes, in a day, the minutes set for a watched app or site
- ✓ An email naming the computers left on after closing time
- ✓ The CSV export of the week or the month, from each tracker
- ✓ The access log, which says which manager read what

Maintenance and support

- ✓ One year of updates. You download each new version released, fixes included.
- ✓ Your version keeps working, for life. After the first year, a newer version needs a new licence.
- ✓ Technical help, remote or on your premises, is a paid service, on a quote. It covers a reinstall, moving the server, adding computers or training.
- ✓ The server makes its backups on the disk you choose.

Installation and start

- ✓ Saldae Dev installs the server on your local server or infrastructure, as a service.
- ✓ The tracker installs on each computer, Windows or macOS.
- ✓ A setup code, typed in your tracker, makes you the owner.
- ✓ You add your employees from your tracker. Each one connects with a token.
- ✓ A full 14-day trial with your team.

How productivity is measured

By what each app is for

Work, messages and meetings are productive. Browsing is neutral. Entertainment and social media are unproductive. You correct the category of an app or a site for the whole company or for one team, and each team is measured by its own trade.

Deep work counts the most

30 minutes or more of focus without interruption. In the score out of 100, it is worth 100, other work 75, fragmented work 60, neutral 50 and distractions 0.

Switches between apps

Going from the editor to the terminal is still work. Focus cut three times or more in a minute by other kinds of apps becomes fragmented work. Every switch can be browsed, to the second.

A pause without the keyboard is not a fault

Reading, a call or thinking for five minutes or more without keyboard or mouse is not measured. The activity level shows beside the score, never inside it.

Fair to your employees

- ✓ Each employee sees the same figures in their own tracker: their score, their categories, their screenshots
- ✓ Screenshots sharp, blurred or off, window titles or names only: one rule for everyone, chosen by you
- ✓ Each manager sees their own teams only, and screenshots only if you grant it; the access log says who read what
- ✓ Never keystrokes or what is typed, only whether the keyboard or mouse were used
- ✓ The Team View puts deep work forward, not a ranking by activity
- ✓ Each employee's connection screen says what the tracker records

Common questions

Do my employees see their own figures?

Yes. Each one sees in their tracker their score, deep work, switches and screenshots, as you see them. They do not see anyone else's.

Can productivity be measured differently for each team?

Yes. From the Categories page, the owner picks the whole company or one team, then says for each app and each site which category it counts in. A marketing team can count social media as work, while it stays unproductive for the others. What a team leaves alone follows the company, and its score is worked out with its own choices.

How much is Saldae Tracker Business for 10, 25 or 50 computers?

110,000 DA for 10 computers, 240,000 DA for 25 and 440,000 DA for 50, paid once. The licence is 50,000 DA for the server and 4 computers, then 10,000 DA for each computer from the 5th to the 15th and 8,000 DA from the 16th. Installation on your side is on a quote.

Where your data is kept

On the server installed in your company, on your local server or infrastructure. Productivity is calculated on your computer. Nothing goes through us.

What it runs on

- ✓ For each computer, macOS 13 Ventura or later (Apple Silicon or Intel), or Windows 10 or later, 64-bit
- ✓ A computer that stays on (Windows 10 or later, macOS 13.5 or later, or Linux): the server installs on it as a service, Docker optional
- ✓ The computers reach the server over your network, or through a VPN for those working elsewhere
