Saldae Tracker Personal
Sheet of 22 November 2026

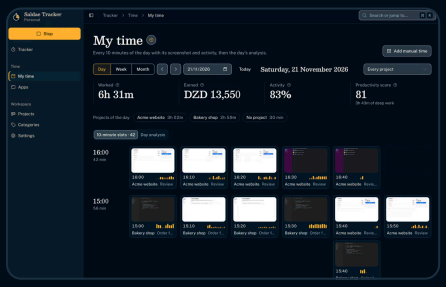

Saldae Tracker, the time tracker that tells you about your day

Press Start. Every 10 minutes go into your Work Diary with a screenshot, your activity and the apps you used. You choose the project now or later.

Your day, told

What you see

A Work Diary of 10-minute slots

- ✓ My time opens on your day: each slot holds one screenshot taken at a random moment, your memo and ten activity bars. The day's analysis is in the next tab.
- ✓ Each bar is a minute, as tall as your use of the keyboard or mouse. The tracker reads the system's idle time every 5 seconds and never records keystrokes.

Productive or not, and why

- ✓ Each minute counts by what its app is for: work, messages and meetings are productive, browsing is neutral, entertainment and social media are unproductive.
- ✓ Deep work is 30 minutes or more of focus without interruption. It weighs the most in a score out of 100.

A Timesheet that earns

- ✓ You see the week's hours per project and day, with each day's total. Each project's hourly rate turns into earnings, with one total per currency.
- ✓ Click a day to open its screenshots. Time without a project has its own row until you assign it.

Every feature

Timer

- ✓ Start in one click, no project or setup first
- ✓ A project chosen during the session takes the time already tracked, or starts from now on
- ✓ A memo of what you do, kept with the time
- ✓ S to start or stop, from any screen
- ✓ The timer in the menu bar, with the window closed
- ✓ A weekly limit per project that stops the timer

Work Diary

- ✓ Every 10 minutes with a screenshot taken at random
- ✓ Ten activity bars, one per minute, as tall as its time on keyboard or mouse
- ✓ Never keystrokes, never what is typed
- ✓ Idle time set aside, to keep or discard when you are back
- ✓ Manual time for calls and meetings
- ✓ Assign, describe or delete slots in bulk

Your day

- ✓ Hours, start, end and breaks
- ✓ Your longest focus and most active hour
- ✓ The time on social media and entertainment
- ✓ How the day compares with a typical one
- ✓ A timeline coloured by category, project or app
- ✓ What you did, told by your memos or your windows

Productivity

- ✓ Productive, neutral and unproductive time, by what each app is for
- ✓ Deep work, 30 minutes or more of focus without interruption
- ✓ A productivity score out of 100, with its rule written down
- ✓ Every switch between apps in order, with the bursts and the most frequent pairs
- ✓ Hour by hour, with the activity level beside the score

Apps and sites

- ✓ The app in front and its window title
- ✓ The site of the open tab, on macOS and Windows
- ✓ Instagram, TikTok, Facebook and the rest recognised as social media, as apps or as sites
- ✓ Each app in a category you can correct
- ✓ A day, a week or a month analysed, exported as CSV

Projects and timesheet

- ✓ Optional projects, with client, hourly rate and limit
- ✓ The week or the month by project and day
- ✓ Earnings at each project's rate, per currency
- ✓ Time without a project assigned afterwards
- ✓ CSV export for a client or an accountant

Privacy and data

- ✓ Screenshots on, blurred or off
- ✓ Window titles, app names only, or nothing
- ✓ Everything stays on your computer; nothing goes through us
- ✓ The data folder moved wherever you want
- ✓ macOS permissions asked from Settings only

Workspace

- ✓ An illustrated guide on every screen
- ✓ Search or jump anywhere with ⌘K
- ✓ An MCP server, the protocol that lets an AI assistant such as Claude, Cursor, Codex or OpenCode start the timer and read your day
- ✓ macOS and Windows

Where your data is kept

With the Personal edition, on your computer, in the folder you choose. With the Business edition, on the server installed in your company, on your local server or infrastructure. Nothing goes through us.

What it runs on

- ✓ macOS 13 Ventura or later, on Apple Silicon or Intel
- ✓ Windows 10 or later, 64-bit
- ✓ No server to install. Everything stays on your computer.
